NOVEMBER RELIEF

The beginning of a winter of unprecedented need for family relief and aid to the transient and homeless is indicated in the reports for the month of November forwarded to the United States Children's Bureau by public and private agencies in all sections of the country.

Relief in 125 Cities

In November the amount expended for relief by 993 agencies in 125 cities of 50,000 or more population totaled $27,705,934. This expenditure was 16.2 per cent above the $23,848,734 expended by the same agencies in the preceding month and 80.3 per cent above the $15,365,182 expended for relief in November, 1931. (Table 1.)

As is illustrated in the chart below, the increase in November occurred mainly in expenditures for general relief. The amount expended for such relief in November exceeded the expenditure in March, 1932, the peak month of last winter's relief load, and the largest expenditure previously reported.

Special allowances from public funds (mothers' aid, old-age relief, and aid for the blind) continued to show in November the slight upward trend obvious in the reports of earlier months.

Work relief increased, but the outlay was considerably less in November than the monthly amounts for such relief reported last winter.

The number of families aided by the various types of direct relief rose between October and November, especially the number aided by emergency-relief committees, the Salvation Army, city departments administering general public relief, and private agencies providing assistance to veterans. (Table 2.)

For the first time in recent months, however, the reports showed a definite tendency for the increase in the number of families aided through general relief to be less than the increase in the amount expended. The result was a larger monthly grant per family for general relief. In November such relief averaged $20.57 per month per family

Amount of Relief from Public and from Private Funds — 993 Agencies in 125 Cities

in comparison with $18.50 in the preceding month. In November,1931, the average grant per family was $17.84.

The allowance per family group for mothers' aid was slightly larger in November than in October, but considerably less than the average amount provided in November,1931. In November, 1932, the average monthly grant for mothers' aid was $43.79; in October, 1932, $43.24; and in November, 1931, $45.90.

Old-age relief per individual case decreased to a monthly average of $25.97 in November from a monthly average of $26.21 in the preceding month and $28.83 in November, 1931. Aid for the blind, which is given also in relation to the needs of an individual case, averaged approximately the same in November as in October, but was slightly higher than in November, 1931. In November, 1932, an average of $24.81 was provided; in October, 1932, $24.97; and in November, 1931, $24.29.

As was discussed in the last bulletin,a large proportion of the total amount expended for relief is financed from the public treasury. In November a slightly smaller proportion was financed from public funds than in the preceding month, but a much larger proportion than in November, 1931. Special allowances from public funds and expenditures for work relief tended to decrease in relation to the total amount expended. The proportion for general relief, especially from public funds, was much larger in November, 1932. The percentage distribution by source of funds and type of relief was as follows for the three months compared:

	November, 1931	October, 1932	November, 1932
Total	100	100	100
Public funds	73	90	88
General relief	39	61	62

Work relief	14	15	13
Private funds	27	10	12
General relief	21	8	10

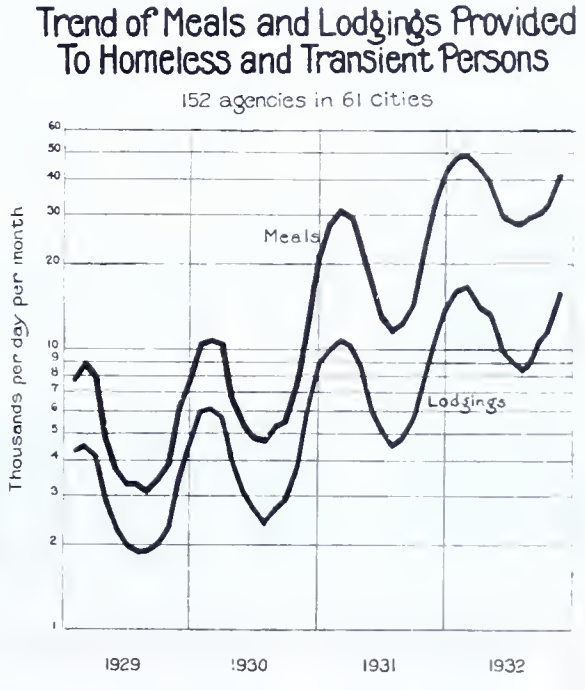
Meals and Lodgings for the Homeless and Transient

The need for relief as measured by the number of meals and lodgings provided to the homeless and transient rose sharply in November.



Reports from 158 agencies in 60 cities of 50,000 or more population show that the number of meals served increased from 862,100 in October to 1,027,907 in November, a rise of 23.2 per cent in the average number served per day. In comparison with November, 1931, the number of meals increased 26.6 per cent.

The number of lodgings provided increased more rapidly than the number of meals. In November 393,526 lodgings were provided in comparison with 317,407 in the preceding month, an increase of 28.1 per cent in the daily average. Between November, 1931, and November, 1932, the number of lodgings increased 36.4 per cent.

State and City Totals for Relief

The State summaries forwarded by State agencies (Table 3) and the city totals compiled for certain areas (Table 4) are consistent in their indication of a strong tendency toward increase in all sections of the country in relief expenditures and in the number of families aided.

In New Jersey general public relief, as reported by the State Emergency Relief Administration, increased 15.9 per cent between October and November in the amount expended and 5.2 per cent in the number of families aided. The State Unemployment Relief Commission in Rhode Island reported an increase of 15.2 per cent in expenditure for home relief and 16.6 per cent in the number of families aided. Expenditures for general public relief in New York State, as reported by the State Department of Social Welfare, rose 12 per cent and the number of families aided, 9.1 per cent.

The November report of the New York State Temporary Emergency Relief Administration shows an increase of 2.2 per cent in the number of families aided through work relief but a decrease of 5.6 per cent in amount expended. In Rhode Island the number of families aided through work relief increased 4.3 per cent and the amount expended, 9.0 per cent.

Information forwarded by agencies in 106 cities was sufficiently complete for use in determining changes in city totals. These cities were located in 33 States and the District of Columbia.

In 87 of the 106 cities an increase was reported in the amount expended in November in comparison with the amount expended in the preceding month. In 41 of these cities the increase was 20 per cent or more. The median change for the entire group was an increase of 12.9 per cent.

Between November, 1931, and November, 1932, relief increased in 96 of the 105 cities for which substantially complete reports for both months were available. In 47 of these cities the increase was 100 per cent or more. The median change for the entire group was an increase of 82.8 per cent.

1/ Reports from 1 or more agencies in the following cities are included in the summaries in Table 1, but the expenditures reported to date are not sufficiently complete for use in determining local trends: San Francisco, Miami, Des Moines, Brockton, Cambridge, Somerville, Springfield (Mass.), Camden, Paterson, Trenton, Springfield (Ohio), Oklahoma City, Tulsa, Harrisburg, Sharon, Nashville, Houston, Salt Lake City, Huntington.

2/ Reports of agencies or divisions of departments that functioned in any one of the 3 months compared.

3/ Reports from 1 or more important agencies have not been received, but figures as shown are considered sufficiently complete for use in determining local trends.

4/ Work relief was provided but the amount expended is not separately reported.

5/ Figures not available.

Federal Relief

The Reconstruction Finance Corporation made available during December $135,200 for use in meeting current emergency relief needs in South Carolina and $35,702,167 for use in 28 of the 35 States previously aided. These authorizations brought the amount provided from Federal funds under Title I of the Emergency Relief and Construction Act of 1932 to a total of $112,614,673 on December 31.

The distribution by the American National Red Cross of Government-owned wheat and cotton made available by act of Congress for the relief of distress reached more areas in December. The number of families aided and the amounts of flour, cloth, and clothing distributed also rose sharply.

The December changes in the cumulative totals since the beginning of flour-distribution in April and cloth-distribution in August were as follows:

SPECIAL SUPPLEMENT
MONTHLY RELIEF BULLETIN

RELIEF PROVIDED IN CERTAIN CITIES JANUARY, 1931--SEPTEMBER, 1932

Changes in the amount expended each month for general relief, special allowances from public funds, and work relief in certain cities of 50,000 or more population are shown in the following summaries covering the period from January, 1931, through September, 1932.

The monthly totals for cities and city areas as given differ in certain instances from those presented in previous monthly relief bulletins. Reports have been included that were received too late for the monthly tabulations. If the reports of an agency are not complete for the entire period, they have been omitted. Preliminary figures have been revised.

The total expended during the first nine months of the year was much larger in nearly all cities in 1932 than in 1931. The organization or termination of special projects, usually those for work relief, resulted in exceedingly large percentage changes in city totals for certain months. In all cities the amount expended for relief rose rapidly during the winter and early spring.
